

## Issue 42 (April 2023)

### Faculty Achievement

#### Department of Materials Science and Engineering

A research team co-led by Dr ZENG Zhiyuan and a professor at MIT successfully developed a tiny device to hold liquid specimens for transmission electron microscopy (TEM) observation. It is believed that this innovative method will shed light on strategies for fabricating a powerful research tool to uncover the mysteries of electrochemical processes in the future.

### Student Achievement

#### Department of Computer Science

A team comprising Miss CHIANG Cheuk Chi, Mr CHONG Ping Kuen, Mr WONG Ka Hing, and two other students from PolyU and HKUST won the Third Place in the Web3.0 Developer Hackathon, organised by the IEEE Blockchain Group Hong Kong.
